Subject: Discontinuation

For tremendous decrease and slower growth in the market demand, we, Torex Semiconductor Ltd., decide to discontinue products listed in the attached paper due to the difficulties of constant and stable production.

We are overwhelmed with gratitude to our customers who have supported these products for many years since they were released. If you have any inquiries, please ask Torex sales person or representatives.

Last of all, it is our mission to reflect our appreciation in product development and release so as to satisfy customers' need as much as possible. We appreciate very much for your great understanding to this discontinuation issue and your continuous support to our products.

Best regards,
