EV1476-TF-00A

High-Efficiency, 800kHz,2A, 18V.
Step-Down Converter Evaluation Board

DESCRIPTION

The EV1476-TF-00A Evaluation Board is designed to demonstrate the capabilities of MPS' MP1476, a fully-integrated high-frequency, synchronous rectified, step-down, switch-mode converter with internal power MOSFETs. It offers a very compact solution to achieve a 2A continuous output current over a wide input range, with excellent load and line regulation. The MP1476 has synchronous-mode operation for higher efficiency over the output current-load range.

Constant On-Time control operation provides very fast transient response and easy loop design as well as very tight output regulation.

Full protection features include SCP, OCP, UVP and thermal shutdown.

The MP1476 requires a minimal number of readily-available, standard, external components and is available in a space-saving SOT563 package.
