User Guide

Find My Device

Powerful Locator for Keys, Bags, and More

The Tag is a universal item finder that works with the Apple Find Mynetwork or Find Hub network to help you locate your valuable items.During initial setup, you can select your preferred network. However, the findercannot operate on both networks simultaneously. Once a network is selected, theother is automatically disabled. To switch networks, you must perform a factoryreset on the finder.

Main Functions

Button instructions:

1. To turn on the device: Press the button briefly. A prompt tone will sound and the device will power on.
2. To check the status: Press the button briefly. A "beep" sound will indicate that the device is in working condition.
3. To turn off the device: Press and hold the button for more than 5 seconds. Three "beeps" will sound and the device will power off.

Apple Pairing the device:

1. Press and hold the device briefly to turn it on, and bring it close to your iPhone.
2. Open the "Find My" app on your iPhone.
3. Tap the "Items" tab, then tap the "+" sign and select "Add an Item".
4. When you see the name "Earth Tag"，"Venus Tag"，"Smart Finder Card" or "Other Name", tap to connect.
5. Name your device and select an emoji.
6. Tap "Agree" to confirm that the item will be associated with your Apple ID.
7. Tap "Done".

Enable Lost Mode:

1. Open the "Find" app, tap the item label, and then select your item.
2. In Lost Mode, tap Enable.
3. Read the guide, tap Continue and enter your phone number or email address for contact, then tap Next.
4. Confirm the custom lost message and tap Activate to complete the setup.

Remove the device:

1. Open the "Find" app, click on the item tag, and then select your item.
2. Click "Remove", and then click "Remove" again to complete the operation.
3. Press the button three times in quick succession, and then hold it down for the fourth time until you hear a long "beep~" sound.
4. At this point, the item has been restored to factory settings and can be paired with a new account.

Location and Notification

Open the "Find My" app, tap the item tag, and then select your item (the item has a location time display).

1. Locate the item when it is nearby

After selecting the item, tap "Play Sound", and the item will emit music, making it easy for you to locate it.

2. Find the item's location

After selecting the item, its location will be displayed on the map. To navigate to the item's location, tap "Navigate" to open Apple Maps.

3. Enable "Notify When Left Behind"
After selecting the item, turn on the "Notify When Left Behind" switch under "Notifications". When you leave the item and it is out of range of your device, you will receive a notification.

4. Enable "Notify When Found"
After selecting the item, turn on the "Notify When Found" switch under "Notifications". When your item is discovered by another device using the "Find My" app, you will receive a notification of its location.

Note: The "Notify When Found" switch can only be enabled when your item is out of your range.

Important Note:
When pairing devices using the "Find My" app, your phone will connect to Apple servers. The pairing may fail due to network issues. Here are some solutions:

1. Update your phone's network, such as switching between Wi-Fi and mobile data.

2. Reset the device: Press the button briefly three times in a row, and then press and hold it for the fourth time until you hear a long "beep" sound. Release the button to complete the reset.

3. Re-pair the device in the "Find My" app.
